PROFILE SUMMARY

Junior Software Engineer with hands-on experience building, deploying and maintaining production SaaS applications. Experienced with Python, FastAPI, React/Next.js, PostgreSQL, Docker and cloud environments, with additional experience in AI/RAG systems, automated deployment and production troubleshooting.

LinkedIn | GitHub | Portfolio

SKILLS

Languages : Python, JavaScript, TypeScript, SQL

Backend : FastAPI, Node.js, Flask, REST APIs

Frontend : Next.js, React.js, HTML5, CSS3

Databases : PostgreSQL, MySQL, MongoDB

Cloud and DevOps : Docker, Docker Compose, GCP, Microsoft Azure, Nginx, PM2, Linux, Bash

AI and LLMs : Retrieval-Augmented Generation (RAG), Ollama, Gemini API, Vector Embeddings

Developer Tools : Git, Postman, k6

WORK EXPERIENCE

Software Engineering Intern | Geni5

Feb. 2026 – Present

Sakhi Digital POSH Compliance Platform

Product: sakhi.geni5.com

Company: geni5.com

- Deployed and maintained production SaaS services on GCP using Docker, Docker Compose, Nginx and Linux, troubleshooting application, service, networking and configuration issues across environments.
- Designed and automated a one-command deployment solution using shell scripts and Docker, simplifying multi-service application setup for on-premise and staging environments.
- Diagnosed and resolved high-priority full-stack production incidents across REST APIs, PostgreSQL connection pooling, and token-based authentication/authorization, maintaining high platform reliability.
- Optimized and benchmarked an Ollama-powered RAG pipeline, refining prompt grounding and chunking to deliver fast, context-accurate compliance responses.
- Executed stress and load testing with k6, benchmarking API latency, identifying database bottlenecks, and tuning system behavior under concurrent request spikes.
- Built functional and integration test workflows covering authentication, employee management, training, certificates, and other core platform flows.

PROJECTS

YouTube Recommendation Modifier and Personalized Learning Assistant | React, TypeScript, Node.js

- Engineered a full-stack learning platform integrated with the Gemini API to curate personalized educational video playlists based on explicit user topic goals.
- Integrated the Gemini API to generate personalized learning recommendations and improve content relevance.
- Built a Chrome Extension with Focus Mode to reduce distractions by filtering non-relevant YouTube content.

eGuru LMS Production Deployment and Cloud Migration | Linux, Bash, Nginx, systemd, TLS, DNS

- Migrated a production eGuru LMS instance from an Azure VM to HostZop, transferring the application database and uploaded course content and validating database integrity.
- Configured Nginx, HTTPS, DNS, and Linux service management on the destination server.
- Fixed LiveKit integration by aligning application and video server credentials.

EDUCATION

Vivekananda College of Engineering and Technology

Bachelor of Engineering in CSE (Data Science) | CGPA: 7.85

2022 – 2026

Puttur, Karnataka
